**PART 2**

# Poetry About childhood

Here we can look at two poems written by Ulstermen—Seamus Heaney and James Fenton. These two men come from different traditions within Northern Ireland but as they write of their memories of childhood in their poetry you can see that they share experiences of life.

## Meet The Poets

**SEAMUS HEANEY** was born in Derry on 13 April 1939. He was brought up on the family farm at Mossbawn.

He was educated at Anahorish, St Columbs and Queen's University.

He trained as a teacher and went on to work at both Harvard and Oxford Universities.

In 1995 he was awarded the Nobel Prize for Literature.

**JAMES FENTON** was born in 1931 and grew up in the townlands of Drumadarragh and Ballinaloob in County Antrim.

He was educated at Stranmillis College and Queen's University and became a teacher and then a school principal.

He wrote 'The Hamely Tongue' which is a collection of Ulster- Scots words and this poem comes from his first poetry collection 'Thonner and Thon'.

He lives now in Glengormley on the outskirts of Belfast.

# Poetry About childhood

In the two poems 'Digging' by Seamus Heaney and 'Dinnis' by James Fenton, the two men are writing about their childhood memories.

They were both brought up in farming communities and so they are remembering episodes from their childhood to do with adults working on the land.

## Digging

By Seamus Heaney

Between my finger and my thumb  
The squat pen rests; snug as a gun.

Under my window a clean rasping sound  
When the spade sinks into gravelly  
ground:

My father, digging. I look down

Till his straining rump among the  
flowerbeds

Bends low, comes up twenty years away  
Stooping in rhythm through potato drills  
Where he was digging.

The coarse boot nestled on the lug, the  
shaft  
Against the inside knee was levered firmly.  
He rooted out tall tops, buried the bright  
edge deep

To scatter new potatoes that we picked  
Loving their cool hardness in our hands.

By God, the old man could handle a spade,  
Just like his old man.

My grandfather could cut more turf in a  
day

Than any other man on Toner's bog.  
Once I carried him milk in a bottle  
Corked sloppily with paper. He  
straightened up

To drink it, then fell to right away  
Nicking and slicing neatly, heaving sods  
Over his shoulder, digging down and  
down

For the good turf. Digging.

The cold smell of potato mould, the  
squelch and slap  
Of soggy peat, the curt cuts of an edge  
Through living roots  
Awaken in my head.  
But I've no spade to follow men like them.

Between my finger and my thumb  
The squat pen rests.  
I'll dig with it.

# Poetry About childhood

## Dinnis

By James Fenton

A gaen farder, thon day, nor iver, adgin canny  
Ower the stick brig, booin nerra  
Ower the slow blak watter o the sheugh, an awa  
Ower the sookin fog an gruppin ling,  
The boag streechin oot aheid, far,  
An far, waitin, an thonner  
He wuz, stretchtin hissels in the bink-bottom, blak  
Han lifted, the gless o  
The square bottle glancin lake fire,  
The heid bak, thrapple thrabbin wae  
The lood glug o his swally, tae  
He stapped, waited, rifted an  
Pushed it bak doon inty the blak  
Glar.

Pechin, sweerin, he hilshed hissels up,  
Plartin doon, heavy, on the binkheid, the face  
Big, roon, bleezin rid an  
Rinnin wat.  
'Davy Leary his a machine  
Dis this'  
(*His an dis, naw haes an daes: an*  
Ower his shooter,  
Thon far, dark shape on Tullaghans).

A lucked roon, luckin  
Bak, an sa the ithers, awa  
Thonner, booed  
Ower the fittin, an,  
Niver missed,  
Stud wee in the wileness o the boag  
an  
The wile, hantin reek  
O whuskey.

# Poetry About childhood

- Explain in your words what experience the young Heaney and the young Fenton have in common.

## LISTEN AND LOOK AGAIN!

In 'Digging' find 3 onomatopoeic words which Heaney uses

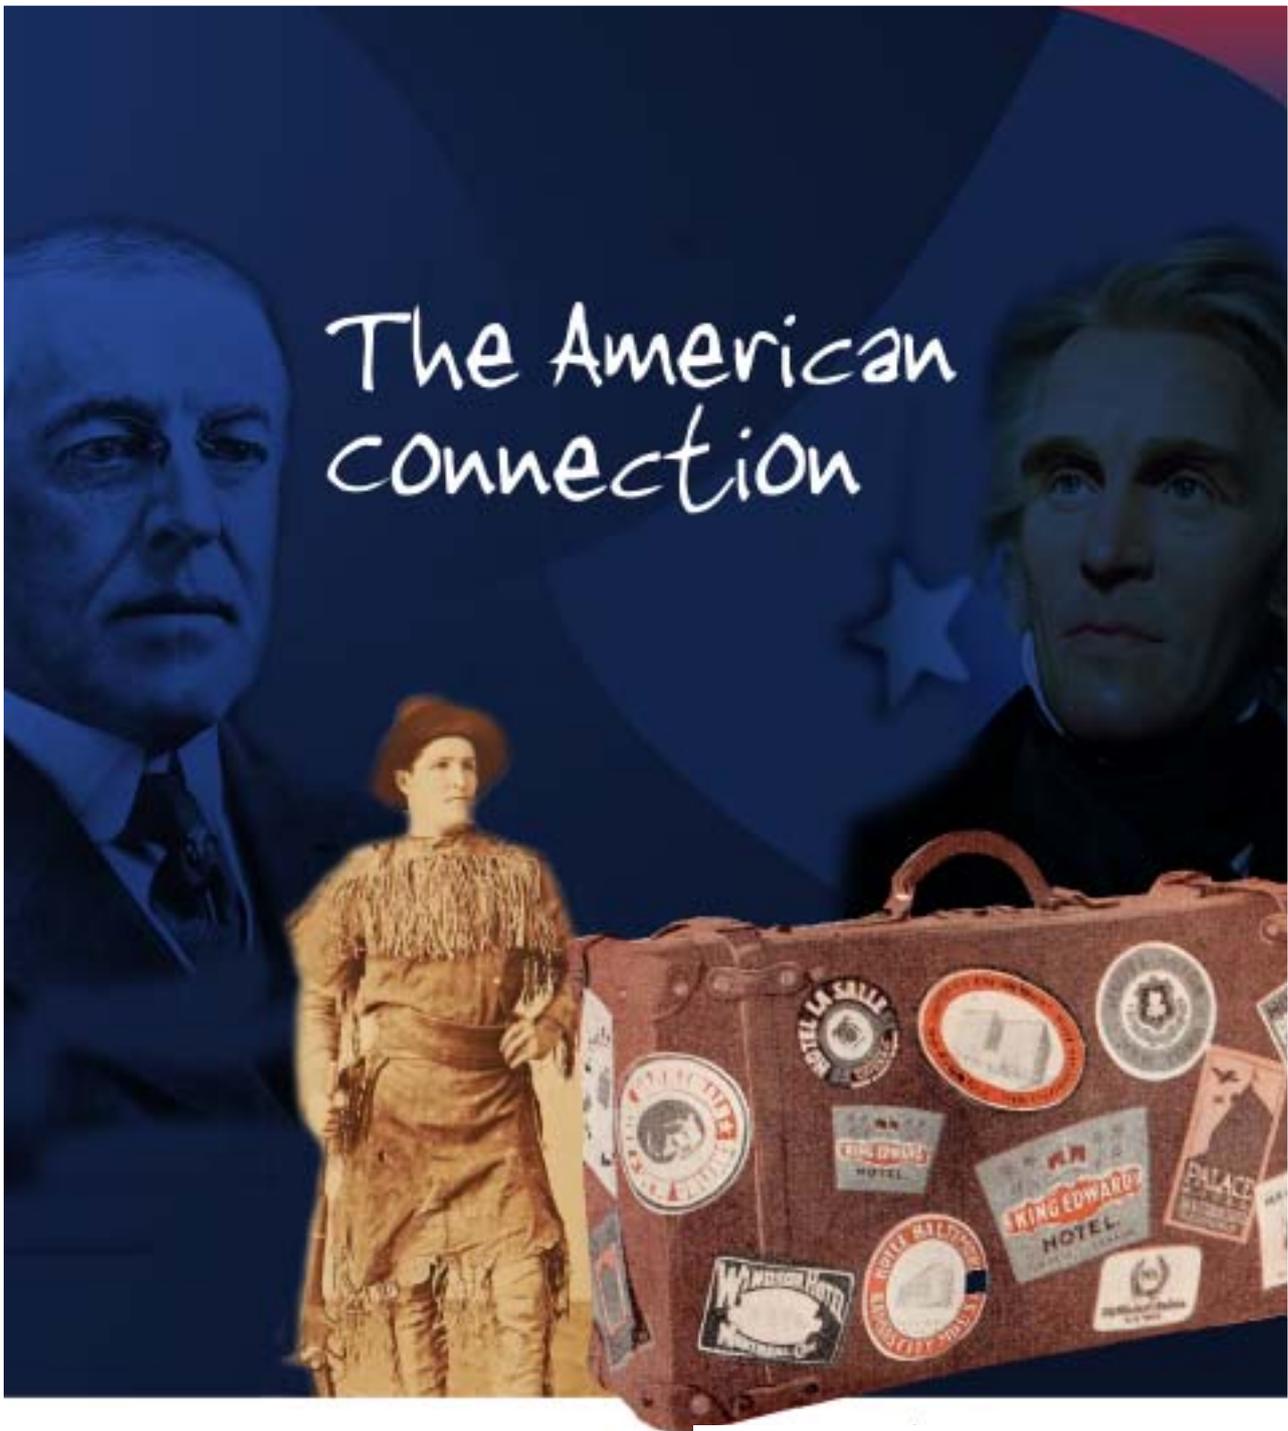

## LISTEN AND LOOK AGAIN!

What do you think these words which Fenton uses

mean?  
sheugh  
sookin  
thrabbin  
glug  
pechin

## Try It Yourself

- Think back to an event or occasion in your childhood.
- Try writing your own poem about it.
- Use onomatopoeia to help your readers 'hear' and 'see' the experience more vividly.

# The American connection

How the Ulster-Scots became the Scots-Irish

# Self Management VAK Routes

You need to find out the facts of the story of the journey of the ship the *Eaglewing* carrying a party of Ulster-Scots to North America.

You are going to choose how you want to do this.

## CHOOSE ONE OF THESE

Read the story yourself or with your teacher or in a group

Listen to the tape of the story

Use the internet to research the story of the *Eaglewing*

Now you are going to choose which task you would like to complete to show you have understood the information you have read or heard and that you can select from it appropriately.

## CHOOSE ONE OF THESE

*either*

Answer the 'Reading for Understanding' worksheet

*or*

Prepare a cartoon story-board of what happened for a wall display

*either*

Answer the 'Listening Comprehension' questions

*or*

Retell the story to your partner

*either*

Complete the sequencing exercise

*or*

Act out a role play of the story with

The first passenger ship to leave Ulster and head for North America was called the *EagleWing*. It set out just 16 years after the Plymouth fathers sailed in their ship the *Mayflower* to settle in Pennsylvania. The Eagle Wing left Groomsport bound for Boston on 9th September 1636 with 140 Presbyterians- four ministers (clergy) and 136 laity - from congregations in counties Down and Antrim on board seeking a new life in the New World.

Groomsport at this time had a thriving Presbyterian congregation who, because of persecution, did not have the opportunity to practise their beliefs freely. The son of the Governor of Massachusetts had invited them to come to the New World where they would have the freedom to worship as they wished and would not be persecuted for being Presbyterian. Two ministers— Robert Blair and John Livingstone—commissioned the building of a ship which would be able to transport them and their entire congregations to America. The result was the *EagleWing* which was built in Groomsport with wood from the Dufferin Estates. The name, which was a popular one for ships at this time, was taken from a Bible verse: '*Ye have seen what I did to the Egyptians and how I bore you on eagle's wings and brought you to myself.*' (Exodus chapter 19, verse 4)

The total cost of construction would probably have been in the region of £1000. Records show that the ship had a carrying capacity (burden) of 150 tons and was rigged with fore and main masts, a mizzen at the stern and a bowsprit. The sails would have been made of hand-sewn flax canvas and the rigging (probably about 8 tons of it!) would have consisted of around 350 hemp ropes. There would probably have been a crew of between 20 and 35 men.

When all was ready the ship set out. It was the 9th September 1636. This was too late in the year to sail around the southern coast of Ireland so instead they sailed towards the north. Blair records: *“When we had passed the back of Ireland and had entered the great ocean, O what mountains, not waves of sea did we meet. The swellings of the sea did rise higher than any mountains we had seen on earth, so that in the mid-day they hid the sun from our sight.”*

When the ship reached mid Atlantic it was caught up in a fierce storm. *“Heavy rain did break our rudder, much of our gallon-head and fore-cross-trees, tore our foresail, five or six of our champlets and a great beam under the gunner-room door broke. Seas came in and wet all them that were between decks,”* wrote Reverend John Livingstone.

Although the passengers had completed almost 800 miles, about two thirds of their journey to America—something that they may not have realised— they decided to turn back rather than go on. One of the ministers on board – the Reverend John Livingstone – said that it was God’s will that they should return. The ship’s captain agreed with him so the ship was turned around and they headed back for Ireland.

Perhaps it was just as well that they decided to turn back for reports say that when the *EagleWing* reached Carrickfergus Bay on the 3rd November 1636 the ship’s sails were ripped into shreds, the mainsail was in ribbons and the rudder had been badly damaged. Blair’s young son, William, died on the night they returned.

Although the *EagleWing* never reached its destination and returned to Ulster after two months at sea, it could be said to be the spark that lit the flame of emigration which was to be fanned into life over the next two centuries. *Friends Goodwill* sailed from Larne in 1727 and became the first recorded vessel from Ulster to reach North America beginning the connection with America.

# Eaglewing comprehension

## Reading for Understanding

1. From which port in Ulster did the ship the *Eagle Wing* set sail?
2. Who invited the group to go to America?
3. Why did they want to leave Ulster?
4. How many in total were on the ship?
5. Of what were the sails of the ship made?
6. On what date did the ship set sail?
7. Why did the ship sail north?
8. In your own words, explain what happened to the *Eagle Wing* and its passengers.
9. Which port in Ulster did the ship return to?
10. Why was the homecoming sad for the Rev Robert Blair?

### Work It out

Work out, from the information in the passage, approximately how far the journey from Ulster to America was. Explain how you reached your answer.

### Work It out

What does the word 'commission' mean?

### Further Research

The name 'Eagle Wing' was a very popular one for ships. In the passage you can find the bible reference.

Why not look at the story and find out why people would have been glad to use this name.

# On Board Eaglewing

We do not know exactly what the EagleWing was like but we can have a good idea from looking at other ships of the same size built at this time. We can also research records which show that it had a carrying capacity of 150 tons and we do have details about the rigging on the ship which also helps us to work out its size.

Researchers estimate that the *Eaglewing* was:

<b>Length</b>	70 feet	21.4 metres
<b>Breadth</b>	21 feet	6.4 metres
<b>Depth</b>	10 feet	3 metres

Perhaps you could measure out this size in your assembly hall or gym.

Think about what it would have been like on board the *Eagle Wing*.

Remember these dimensions were the overall ship not the interior which would have been even smaller!

Conditions would have been difficult because:

- There was no heat
- There was no water for washing
- There were buckets for toilets
- The deck leaked soaking the passengers
- Drinking water was strictly rationed
- Food was mostly biscuits and salted beef and pork
- There were cooking facilities for the passengers
- The ship's crossbeams were 5 feet above the floor
- The ship's hold carried food for 2 years on land
- The deck was cluttered with livestock pens

Read or listen again to the details of the story of the *Eaglewing* and those who sailed in her.

Imagine that you have been commissioned to write a radio play about this adventure.

Write a script for the section of the play when the captain and passengers decide to turn back. Your scene should last about 2 minutes.

## THINK ABOUT.....

You will need to think about why they make this decision and also who would take it. Consider which characters should be in your scene and how they would speak. You should also consider what sound effects you will need.

## NOW...

Write your script. If you need help to set it out ask your teacher for the 'How to set out a drama script' helpsheet.

## FINALLY.....

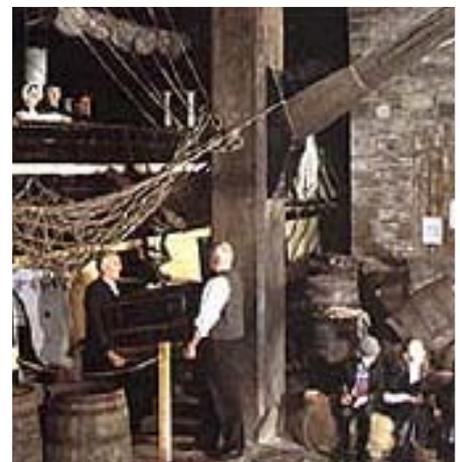

Why not get together in groups and record your scene? Then each group can play back their scene for the whole class to hear and you can compare how you have interpreted the story.

## setting out

In the 18th century about a quarter of a million people left Ulster to find a new and better life in the colonies of North America. Most of these people were Ulster-Scots, that is people whose ancestors had moved to Ireland from Scotland during the years of the Plantation.

Their journey to America was not an easy one. Of course everyone had to travel by ship. Your task is to find out some more about their journey.

*Let's set out.....*

# Your Tasks

## Task 1

You have a blank map of Ulster which is made up of 9 counties. Find out the names of the 9 counties and write them onto the map in the correct positions.

## Task 2

Below are the names of the 8 main ports used to travel from the North of Ireland to a new life in America during the 17th and 18th centuries.

There are 8 red circles on your map. Each one marks one of these ports.

Mark on the names in the correct positions.

**PORTRUSH - WARRENPOINT - LARNE  
LONDONDERRY - CARRICKFERGUS -  
DROGHEDA - BELFAST - DUNDALK**

The Mellon homestead can be seen at the Ulster-American Folk Park near Omagh. The Mellons were just one family out of many which made the sometimes hazardous journey across the Atlantic Ocean in search of a better life for themselves.

Between 1717 and the early 1780s around a quarter of a million Scots-Irish Presbyterian emigrants left Ulster to cross the Atlantic to make a new life for themselves. Their journey could be difficult and hazardous although it must be said that only a very small percentage did not survive the journey.

They travelled in simple wooden sailing ships for anything up to six weeks. They could take little with them—even if they had had many possessions which most probably did not. When they did eventually arrive in America they could be kept on board quarantined until infections had passed.

The first regular Scots-Irish emigrant ships were chartered in 1717. The year was significant. It was when drought completely ruined the crops. 5000 men, women and children headed to Pennsylvania as a result. Another contributory factor was the severe restrictions which were placed on their Presbyterian faith.

The first recorded successful passenger ship from Ulster was the *Friends Goodwill* which left Larne bound for Boston in April 1712.

## The Atlantic crossing Game

You have now learnt something about life on board ship as the emigrants made their journey to America.

Now you can try the Atlantic Crossing Experience on the Ulster-American Folk Park website.

Go to <http://atlanticcrossing.folkpark.com/>

See if you survive the journey and how long your crossing takes.

Good luck!

# Scots-Irish Emigration

You are going to undertake some research on the 1718 emigration of the Ulster-Scots to North America.

Go to the website at

[http://1718migration.org.uk/s\\_originsAndTerms.asp](http://1718migration.org.uk/s_originsAndTerms.asp)

Now try to answer the following questions:

## INTRODUCTION

- 1 How many Ulster-Scots arrived in Boston in 1718?
- 2 Name one area where some of these emigrants settled.

## BACKGROUND TO 1718

Write a paragraph about William Holmes and the 1718 emigration.  
Do not copy and paste your answer but use your own words.

## WHERE THEY CAME FROM

1. Name the two areas in Ulster where most of the emigrants came from.

## WHY THEY LEFT

- 1 Cut and paste the quote from Reverend James McGregor which shows his reason for going to America.
- 2 What else happened in 1714 and 1719 which would have encouraged people to leave Ireland?

## THE VOYAGE

Tell the story of 'Ocean Born Mary' in your own words.

## THEIR ARRIVAL

- 1 Name two of the ships that arrived in Boston in 1718 and where they set out from.

THE SCOTS-IRISH JOURNEY TO THE NEW WORLD

**Extra**

When you have checked the names, why not see what percentage of your class would have emigrated to America?

# Living conditions Aboard Ship

## FOOD AND WATER

Adults received the following amounts of food (children less):

### DAILY:

Loaf of bread (2-3 lbs)  
3 quarts of water

### WEEKLY:

1lb preserved meat  
7 oz sugar  
1lb preserved pork  
1 oz tea  
1 lb salt beef  
1 1/2 oz coffee  
1/2 lb pickled fish  
a little mustard  
3 lbs flour  
1 pint oatmeal  
2/3 pint of pease  
6 oz suet

Nowadays if you were travelling to America by ship it would be a luxury liner complete with swimming pools, cinemas and shops. It was very different in the 18th and 19th centuries.

In the 18th century the most commonly used type of ship was the BARQUE. It usually had three masts and had not been built to carry passengers originally but was converted to carry passengers.

The ship had what was called a POOP DECK where the full fare paying passengers were housed while passengers paying only a part fare or no fare travelled in the area under the main deck which was usually used as the cargo hold. This was usually not even high enough for an average person to stand up straight.

This letter came from Samuel McCullough to his father in Carrickfergus. It appeared in the Belfast News Letter.

24 September 1774

Dear Father

*This comes with our duty to you and our stepmother, and our love to your brothers and sisters, and to let you know that it has pleased God to spare all the principals of out two families, but it was sore on our children; for on the 19th June, Tommy Jackson died, and the day after the two girls, to our great grief, both died in one hour. This was the greatest trouble I ever felt, to see out two fine girls thrown into the ocean after they had been seven weeks on board and were on the coast. Our mate died, and several more men and women and about 12 children. We had great fever on board; men lay raving through all the berths. I never lay down that night, but I was afraid that some of us would have it before the morning. Our children died of a short illness and not of the fever.*

## Task

Keep a food diary for a week. In it you should record all the food (including snacks!) which you eat. Include the amounts (ounces or grams) and compare at the end of the week what you have eaten with what the emigrants had on board ship.
